1. INTRODUCTION

1.1. Arrangement approach and purpose of the document

The present Service Level Arrangement (SLA) is a statement of the intentions of the Commission within the specific context of the Connecting Europe Facility (CEF) Trans European Telecommunications Networks Work Programme 2014 and applies to CEF Software and services. It aims to specify the understandings and expectations on behalf of the Commission with regard to the provision of CEF Software and services.

It has to be noted that this document is a non-binding statement made in good faith, which is not legally enforceable against the Commission, and which creates no new binding legal obligations on the Commission. Any references to duties or obligations within this Arrangement should therefore be understood as a good faith statement of intent only, without any obligation of result or legal recourse in case of breaches of such duties or obligations. As such, this SLA does not require signatures between parties.

This Service Level Arrangement

- Defines the Service Level Targets to be reached by the Solution Provider DG DIGIT (see stakeholders definition section) while providing a Building Block software sample implementation and its services;
- Falls under the Terms of the Building Block Master Service Arrangement available on the CEF Digital Single Web Portal: <https://ec.europa.eu/cefdigital/wiki/x/DAiZAQ>.

This SLA applies to the CEF eDelivery Service Metadata Locator (SML) managed service.

1.2. Glossary

The key terms used in this Service Level Arrangement are defined in the CEF Definitions section on the CEF Digital Single Web Portal:

<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/CEF+Definitions>

The key acronyms used in this Service Level Arrangement are defined in the CEF Glossary on the CEF Digital Single Web Portal:

<https://ec.europa.eu/cefdigital/wiki/pages/viewpage.action?spaceKey=CEFDIGITAL&title=CEF+Glossary>

2. STAKEHOLDERS DEFINITION

2.1. Solution Provider DIGIT

The Solution Provider DIGIT is accountable for the delivery of CEF the Building Block, including the design and implementation of solutions in the form of specifications, software and services.

The Solution Provider DIGIT has to ensure that he respects the terms described in the present SLA when providing a Building Block and its associated software and services.

2.2. Client

“Clients” are the entities which have decided to reuse Building Blocks and associated services described in the present Master Service Arrangement and its associated Service Level Arrangements. Such clients can for example be Directorate Generals of the Commission, or other Large Scale Pilots such as OpenPEPPOL or eCODEX, etc.

3. SERVICE LEVEL TARGETS SPECIFIC TO THE CEF EDELIVERY SERVICE METADATA LOCATOR (SML) MANAGED SERVICE

The Service Metadata Locator Managed Service is shared/central and Critical. The full description of the SML service is available online:

<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/SML+service>.

The full description of the Service desk processes and the distribution of related roles and responsibilities are available in the Service Offering Description (online:

<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/eDelivery+Service+desk>).

The Service desk Service Level Targets are defined in the Service desk SLA document available in on the CEF Digital Single Web Portal:

<https://ec.europa.eu/cefdigital/wiki/display/CEFDIGITAL/eDelivery+Helpdesk>.

This section list all the service level targets that apply to the SML service itself. A Service Level Target is described by several attributes:

- ID: unique identifier of the Service Level Target
- Title: representative name of the Service Level Target
- Importance: “Critical” or “Low”, represents the importance for the client DSI of the Service Provider DG DIGIT to achieve this target
- Description: defines the purpose of the Service Level Target
- Scope: defines to which element(s) applies/y the service level target
- Target: defines the performance (through a value) to be reached by the Service Provider
- Periodicity: defines the duration between each Service Level Target follow-up
- Measurement tools: identify the tools or means to be used to collect the performance data and/or calculate the performance during the period
- Service conditions: describe the service conditions that must be respected to use the service; Service Level Target can be applied only when the service conditions are respected

3.1. Availability

SML1	Availability of the SML during normal working hours	Importance: High
Description	This service level target ensures that the SML is accessible and available to its users during normal working hours.	
Scope	<p>Availability</p> <p>The SML is considered as “unavailable” if it is not reachable for a continuous 120 seconds.</p> <p>Please refer to Service Offering Description for more information on the delivery model.</p>	
Target	<ul style="list-style-type: none"> 99.80% on average 	
Periodicity	Monthly	
Measurement tools	SMT	
Service conditions	<p>Working hours: from Monday to Friday between 08:00 and 18:00.</p> <p>Maintenance time excluded</p>
